

INSTALLATION INSTRUCTIONS

2018 Ford Mustang 5.0L Black

PART NO. 19369

BILL OF MATERIALS:

- 1. X-PIPE ASSY
- 2. D/S MID PIPE ASSY
- 3. P/S MID PIPE ASSY
- 4. D/S MUFFLER ASSY
- 5. P/S MUFFLER ASSY

WEAR SAFETY GLASSES

READ INSTRUCTIONS THOROUGHLY BEFORE INSTALLING PRODUCT

SHOP SUPPLIES:

SPRAY LUBRICANT

To ease removal of existing exhaust components (especially on older vehicles) spray penetrating lubricant on all fasteners and hangers/insulators that will be loosened or removed and let soak before disassembly.

HARDWARE KIT:

- 1. [4] 3.00" Clamp

MINIMUM REQUIRED TOOLS:

15mm
14mm

Hanger Tool
(Or Pry Bar)

MAGNAFLOW RECOMMENDS PROFESSIONAL INSTALLATION ON ALL THEIR PRODUCTS

WARNING: When working on, under, or around any vehicle exercise caution. Please allow the vehicle's exhaust system to cool before removal, as exhaust system temperatures may cause severe burns. If working without a lift always consult vehicle manual for correct lifting specifications. Always wear safety glasses and ensure a safe work area. Serious injury or death could occur if safety measures are not followed.

ATTENTION: Always install any supplied band or U-bolt clamps to the proper torque specifications of 40-45 ft-lbs for band clamps and 30-35 ft-lbs for U-bolt clamps. Over tightening will result in the clamp breaking and will NOT be warranted by MagnaFlow.

INSTALLATION INSTRUCTIONS

Step 1. To begin, determine if your vehicle has OE exhaust valves, if so, you will need to unplug and the electrical connection on the Exhaust Valve Control Motors (Qty 2) located on the OEM exhaust assembly, also disconnect wire harness mounting plug.

Step 2. Begin removing the OEM exhaust system by loosening the clamps located in front of the resonator. Next working front to rear extract the hangers from the rubber insulators and remove the OEM system. Retain insulators and clamps as they will be used to install the new system.

Step 3. Begin installation of the new system by loosely attaching the X-Pipe Assembly to the outlets using the OEM clamps. Leave all clamps loose until final adjustment.

Step 4. Next attach the Mid Pipe Assemblies to the X-Pipe using the supplied 3.00" clamps and fitting the hangers into the rubber insulators.

INSTALLATION INSTRUCTIONS

Step 5. Finish the initial installation by fitting the Muffler Assemblies onto the Mid pipe Assemblies using the supplied 3.00" clamps and inserting the hangers into the rubber insulators.

Step 6. If your vehicle has valves, re-connect the wiring harness plugs to the Valve motors and wire mounting bracket. If not yet purchased, Valve Kit is part# 10805

Step 7. Once a final position has been chosen for the new exhaust system, evenly tighten all clamps from front to rear using the torque specifications on page one of the instructions. Inspect all fasteners after 25-50 miles of operation and re-tighten if necessary.
